Washington State
Crime and Arrest Data

1973 - 1977

based upon

Uniform Crime Reporting
statistics supplied by the
U.S. Department of Justice,
FBI, from voluntary data
submitted by Washington State
Law Enforcement Agencies.

compiled by

Division of Criminal Justice
Office of Financial Management
Olympia, Washington
November, 1979

PREFACE

This report is one of a regular series of descriptive, reference volumes intended for use in research and planning. It was compiled and edited by the Division of Criminal Justice, Office of Financial Management. Data contained herein was obtained from the UCR section of the Federal Bureau of Investigation and supplemented by information received from individual law enforcement agencies within the State of Washington. This publication coincides with the inauguration of the statewide Uniform Crime Reporting program operated under the auspices of the Washington State Patrol and The Washington of Sheriffs and Chiefs of Police. Hitherto, all data was collected and collated at the Federal level, but data will now be reported and maintained locally. Not only will the participating law enforcement agencies benefit from quicker response time, but will also be available in composite form for regional statewide emphasis.

Information contained in this report provides an indicator as to the frequency and distribution of crime within the state as well as neighboring states. Social scientists may search for some serendipitous effect, but that is beyond the intent of this report. Instead, the purpose may be stated as that of building a logical foundation of factual information upon which to base rational decisions to improve a less than perfect system.

The introductory pages present charts and graphs concerning frequency of the major reported crimes and historical comparisons of Washington State crime rates versus the entire nation. Subsequent charts and data depict the State of Washington and its political subdivisions in comparision to neighboring jurisdictions or to itself. Since this is the initial edition of this publication, there is little analytical narrative. Succeeding versions may permit the luxury of more timely data plus time for more introspection and analysis.

This publication was prepared and published with financial assistance from the National Criminal Justice Information and Statistic Service, Law Enforcement Assistance Administration, United States Department of Justice.

INTRODUCTION

INTRODUCTION

This introduction is meant to give the reader a historical overview of crime in Washington State. The charts in this section shows the crime rates per 100,000 population for the years 1958 to 1977.

For both the violent crimes and property crimes, reported crime rates have risen over this nineteen year period. For violent crimes Washington State has closely mirrored the increase in reported crimes for the nation, yet the state's rate has remained consistently lower than the national level. For reported property crimes, Washington State has usually had a higher rate than the national rate. From 1964 until 1977 the gap between the higher Washington State reported property crime rate and the national reported property crime rate has increased substantially.

However, the Washington State property crime rate experienced the same dip in reported property crime rates in the 1976-1977 period that the nation experienced.

In reviewing the total crime rates and the property crime rates for the 1958-1977 period, it is important to realize that the drastic increase in these crime rates is not due to a sudden change in criminal behavior. Rather, this drastic increase is caused by a F.B.I. crime reporting revision in 1972. After 1972 all larcenies and thefts are reported as Part I crimes. Prior to this change, only larcenies and thefts of a value greater than $50 were reported as Part I crimes. This change in statistical reporting is responsibile for a large increase in the number of reported property crimes.

SECTION 1

REPORTED CRIME

SECTION I

PART 1

1973-1977 Index Crime Frequency and Rates for SMSAs (larger urban areas), Smaller Cities and Rural Areas compared to State Totals

REPORTED CRIME

INTRODUCTION

This section presents the number of reported crimes in the State of Washington from three perspectives. First, the reported crime numbers and rates are compared for the years between 1974 and 1977 for Standard Metropolitan Statistical Areas, other cities and rural areas. Second, the Washington State change in crime rates between 1973 and 1977 are compared to United States averages, the Pacific States averages, and the neighboring states of Idaho and Oregon. The data in this subsection allow the reader to compare both the difference in the rates of crime between geographical areas and the degree that changes have occurred in the different areas. The third part of this section shows the reported crime profile of the cities and counties which participate in the FBI Crime Reporting Program. The cities are grouped by size in the following categories:

Greater than 100,000 population
20,000 to 100,000 population
10,000 to 20,000 population
5,000 to 10,000 population
2,500 to 5,000 population
less than 2,500 population.

The counties are listed by size of population in a separate subsection. In 1977 the estimated number of reported crimes in Washington State was 209,521 which is a rate of 5,727.7 per 100,000 population. This overall rate is broken down by type of crimes as follows:

Reported Violent Crimes (TOTAL)	374.9 per 100,000
Murder and Manslaughter	4.3 per 100,000
Forcible Rape	39.6 per 100,000
Robbery	106.2 per 100,000
Aggravated Assault	224.8 per 100,000
Reported Property Crimes (TOTAL)	5,352.8 per 100,000
Burglary	1,605.6 per 100,000
Larceny-theft	3,386.9 per 100,000
Motor Vehicle Theft	360.3 per 100,000

BEST COPY AVAILABLE

STATEWIDE & GEOGRAPHIC SUBCLASSIFICATION CRIME RATE COMPARISONS 1974-1977

An estimated total of 209,521 Part I Crimes were reported to law enforcement agencies in Washington State during calendar year 1977. This is only 241 more crimes than were reported in 1976 and is actually 8,113 less crimes than were reported in 1975. Correspondingly, the rate of crime per 100,000 persons has decreased from 6,140.9 in 1975 to 5,794.0 in 1976 to 5,727.7 in 1977. The lower rate of crime in 1977 than 1976 can be expanded by the increase in the State's population in 1977. As the rate of crime decreases the risk of being a victim of crime decreases.

Part I Crimes referred to here represent the most serious problems to law enforcement and the general population. Part I Crimes are by definition the most serious crimes. They can be broken down into two basic categories -- violent crimes and property crimes. Violent crimes include murder and non-negligent manslaughter, forcible rape, robbery, and aggravated assault. Part I property crimes include burglary, larceny-theft and motor vehicle theft. Other less serious crimes are defined as Part II Crimes.

Together, the Standard Metropolitan Statistical Areas (SMSAs) of Seattle-Everett, Spokane, Tacoma, Yakima, Clark and Richland-Kennewick account for 157,932 or 75.4 percent of the reported Part I Crimes. Standard Metropolitan Statistical Areas are defined by the Bureau of The Census. Generally, they are made up of a core city or cities with a combined population of 50,000 or more and the surrounding county or counties which share certain metropolitan characteristics. An SMSA's social statistics are larger than just the urban center's statistics. For example, Seattle the largest urban center in Washington State accounted for 38,378 or 18.3 percent of the State's total reported cimes in 1977. Meanwhile, the Seattle-Everett SMSA which includes King and Snohomish Counties accounted for an estimated 91,399 or 43.6 percent of the State's total reported crime.

The rate of violent Part I Crimes in 1977 for Washington State (murder, rape, robbery, and aggravated assault) was 374.9 percent of the State's reported crime. The rate per 100,000 of violent crime has decreased from a high of 390.8 in 1975 to 374.9 in 1977. The 1977 rate of violent crime, however, was not as low as 1973 and preceding years. In 1973 the violent crime rate was 271.5 per 100,000. Although violent crime in Washington State as an aggragate reached a high in 1975, this pattern does not hold for all individual types of Part I Crimes. For example, rape has been on a consistent increase from 26.2 reports per 100,000 in 1973 to 39.6 per 100,000 in 1977.

BEST COPY AVAILABLE

Assault deviates from the general trend of reported violent crime in that it peaked in 1976 rather than 1975 at 230.5 per 100,000 and then declined in 1977 to 224.8 per 100,000.

Statewide Part I property crime has followed a pattern similar to reported violent crimes. Property crimes reached a high of 5,750.1 per 100,000 in 1975, decreased in 1976 to 5,405.4 per 100,000, and decreased again to 5,352.8 per 100,000 in 1977. Larceny-theft is the most frequently reported Part I property crime accounting for 63 percent of the reported property crimes in 1977. Burglary which accounted for 30 percent of the reported property crime and auto theft made up the remaining reported property crime. Burglary reached its peak in the reported crimes per 100,000 in 1974. It has since declined each year to a rate of 1,605.6 per 100,000 in 1977. However, as with most other reported crimes, even though the rate has been declining, reported burglaries has not returned to the 1973 level which was 1,540.4 crimes per 100,000.

PART 2

Comparison of Washington State Index Crime Statistics to National, Regional and neighboring States statistics, 1973-1977

WASHINGTON STATE REPORTED CRIME COMPARED TO NATIONAL, REGIONAL, AND NEIGHBORING STATES 1973 AND 1977

Washington State's reported crime rate was higher than the National average from 1973 to 1977. The total crime rate for Washington State was 5089.9 reported crime per 100,000 in 1973 and 5727.7 per 100,000 in 1977. The national rates were 4116.4 per 100,000 and 5055.1 per 100,000 respectively. However, Washington State had a lower reported crime rate than the Western States Pacific Region which includes Alaska, California, Hawaii, Oregon, and Washington. In 1973 the Pacific region reported crime rate was 6013.9 per 100,000, and in 1977 was 6735.7 per 100,000. Looking at neighboring states, Washington State had a higher total crime rate than Idaho but a lower crime rate than Oregon.

Although the total reported crime rate in Washington State is higher than the national average, the reported violent crime rate (murder, non-negligent manslaughter, rape robbery, and aggravated assault) is much lower in Washington State than it is nationally. Nationally, the reported violent crime rate was 414.3 per 100,000 in 1973 and 466.6 per 100,000 in 1977. For the same time periods the Washington State reported violent crime rates were 271.5 per 100,000 and 374.9 per 100,000 respectively. The Washington State reported violent crime rate was also lower than Western States and the Pacific Region. For example, in 1973 the Pacific Region experienced a reported violent crime rate of 492.2 per 100,000, and in 1974 the Pacific Region had a reported violent crime rate of 625.8 per 100,000. And as with the total reported crime rate, Washington State had a higher reported violent crime rate than Idaho but a lower violent crime rate than Oregon for both 1973 and 1977.

The relatively low reported violent crime rate in Washington State is balanced by a high reported property crime rate. In 1973 the reported property crime rate was 4818.5 per 100,000. By 1977 the reported property crime rate had increased to 5352.8 per 100,000 in Washington State. These Washington State reported property crime rates were well above the National Average. The National average reported property crime rate was 3702.1 per 100,000 in 1973 and 4588.4 per 100,000 in 1977.

BEST COPY AVAILABLE

Although the Washington State reported property crime rate is higher than the National Average, it is not quite as high as the Western States and the Pacific Regions. For instance, in 1973 the Pacific Region reported property crime rate was 5521.7 per 100,000, and in 1974 the region reported property crime rate ws 6109.9 per 100,000. Compared to its neighboring states, the Washington State reported property rate is much higher than Idaho's, and is similar to Oregon's. The reported property crime rate in Oregon ws 5004.4 per 100,000 in 1973 and 5531.4 per 100,000 in 1977.

SECTION I

PART 3

1976 and 1977 Index Crime Statistics for cities and counties

PROFILE OF REPORTED CRIME FOR THE CITIES AND COUNTIES OF WASHINGTON STATE

In this section the reported crime by city and county is broken down by type of crime for 1976 and 1977. Also reported in this section is the rate of reported crime rate per 1,000 population. The cities are grouped by size as listed on the INTRODUCTION page. The counties are listed by size of population from large to small. For each population group summary statistics are listed. These include the mean rate of reported crime per 1,000, the standard deviation, and the high and low rates of crime for cities within each population group. The same summary statistics are provided for counties.

The lowest reported average crime rate for cities in Washington State in 1977 was 48 per 1,000 for cities in the 2,500 to 5,000 group. The highest reported crime rate was in cities in the 10,000 to 20,000 group with 76 reported crimes per 1,000. The largest cities, 100,000 and greater, had a reported crime rate of 75 per 1,000. The highest single reported crime rate in 1977 was for a city in the 10,000 to 20,000 range. The rate of reported crime in this city was 124 per 1,000 population. The lowest reported crime rate in 1977 was for a city in the less than 2,500 group. The reported crime rate for this city was 8 per 1,000. The highest reported crime rate for a county in 1977 was 78 per 1,000, and the lowest reported crime rate for a county in 1977 was 5 per 1,000.

REPORTED CRIME FOR WASHINGTON STATE COUNTIES

FOOTNOTES: The "POPULATION" for the counties is determined by adding the unincorporated population (UNINCORP) in the county to the "SCV.AREA" which are those jurisdictions which contract with the sheriff of the county police for law enforcement services. INDEX - Total number of reported crimes for county excluding incorporated jurisdictions which have their own law enforcement agencies. M/M - Murder and non-negligent manslaughter, RAPE - Forcible Rape, ROBB - Robbery, ASLT - Aggravated Assault, BURG - Burglary, LARC - Larceny - Theft, AUTO - Motor Vehicle Theft, C/M - Number of reported crimes per 1,000 population.

SECTION II

ARRESTS

ARREST DATA

INTRODUCTION

Under the Uniform Crime Reporting Program, an arrest is counted each time a person is taken into custody or is cited. The number of charges placed against a person at the time of arrest are not considered in the count. The same person may be arrested several times during a year for similar or different offenses, but is counted each time he/she is arrested.

Juvenile arrest data (age 17 and under) is aggregated in similar fashion to adult with the addition or arrests for status offenses. This is accurate for this report because it contains 1977 crime and arrest data. However, in subsequent reports the listing of status arrests will diminish because the new Juvenile Justice Code for the State of Washington has decriminalized status offenses as of July 1, 1978.

Arrest practices vary, depending on the crime, from jurisdiction to jurisdiction and from time to time wihin a jurisdiction. For example, the volume of arrest for liquor law violations is particularly influenced by the differing individual police policies and manpower capabilities. On the other hand, murder, robbery and other arrests for serious crimes are much more likely to result in similar procedures across all jurisdictions. In either case, arrests are used as a measure of law enforcement activity, but generalizations and comparisons should be avoided without specific research and validation.

In this section, arrest information is reported by major age groups -- adult and juvenile, specific age groups, sex and race. Arrest data is also provided for each reporting jurisdiction by population. For each of these criteria, summary and detail information are provided for part I and part II crimes.

PART 1

General Arrest Information

GENERAL ARREST INFORMATION

During 1977, the local law enforcment agencies reported an estimated 176,820 arrests for all criminal acts. This was a rate of 4,578 arrests per 100,000 population. The number of arrests in 1977 was an increase of 24,677 arrests over the 1976 level. The category that made the major contribution to the increase of the 1977 level over the 1976 level was the increase in the number of adults arrested for Part II crimes. This category of arrest increased 22 percent in one year, while the other categories increased at a much smaller rate.

Part I arrests accounted for 25.38 percent of the total number of arrests for 1977. Persons under 18 years of age accounted for 52.27 percent of the arrests of this type. The juvenile arrest involvement was, as in prior years, greater in the nonviolent crime categories of burglary, larceny, and auto theft. For these major property crimes, juneniles accounted for 50 to 71 percent of the arrests made. On the other hand, for the violent Part I crimes, juveniles accounted for only 8 to 30 percent of violent crime arrests.

SECTION II

PART 2

Arrest Trends, Comparison Data, 1973-1977

ARREST TRENDS

There has been an increase in the estimated number of arrests in Washington State since 1975. However, the number of estimated arrests was decreased from the 1973 level of 172,162 arrests for all types of crime to the low of 136,631 arrests for all types of crime in 1975. Of the number of arrests in 1977 -- 176,820 -- exceeds the previous high of 172,162 arrests in 1973. However, given the growth in the State's population in the period between 1973-1977, the rate of arrest per 100,000 population has decreased so that the rate of arrest in 1977 is lower than the rate of arrest in 1973.

This dip in the number of arrests from 1973 to 1975, and the increase in the number of arrests from 1975 to 1977 can be accounted for by the fluctuation in the number of Part II crime arrests. Where the number of Part I crime arrests has increased each year between 1973 and 1977, the number of Part II crime arrests decreased from 1973 to 1975 and then increased from 1975 to 1977. In 1973, the number of estimated Part II crime arrests was 136,591. By 1975 the estimated number of Part II crime arrests had decreased to 98,385. Then, the estimated number of Part II crime arrests increased until a level of 131,932 arrest was reached. If the recent increase in the number of Part II crime arrests continues and the the increase in the number of Part I arrests remain consistent, we can expect a substantial increase in the overall number of arrests in 1978. A review of the number of arrests per specific types of Part II category crimes shows that those contributing to the recent increase in the number of Part II arrest are other assaults, (i.e. less than aggrevated assault), DWI's, liquor law violations and the "other" category. This contrasts with the decreases in arrests for such Part II crime categories as vandalism, drugs, and disorderly conduct.

SECTION II

PART 3

Arrests by Age, 1977

Arrests by Race, 1977

Arrests by Sex, 1977

ARREST BY AGE

Adults made up the vast majority of arrestees for the violent Part I crimes which include murder, non-negligent manslaughter, forcible rape, robbery, and aggraved assault. Juveniles, on the other hand, account for the majority of the Part I property crime arrests which include burglary, larceny, and motor vehicle theft. On the whole, however, juveniles account for the majority of Part I arrests. For example, in 1977 juveniles accounted for 52 percent of the Part I crime arrests. However, if the percent of Part I crime arrests attributable to various age groups is reviewed, it appears that adult arrests for Part I crime constitute an increasing percentage of the total over a five year span.

In 1973, adults only accounted for 39 percent of the Part I crime arrests. Their proportion of Part I crime arrests has increased each year until 1976 and 1977 when adults accounted for 48 percent of the Part I crime arrests. If this trend continues, it is possible that adults could surpass the juveniles in the number of Part I crime arrests within the next few years.

Part II crimes have consistently been, on the whole, an adult problem. Approximately two to three times as many adults as juveniles are arrested for Part II crimes. Adults make up the majority of arrests in all categories of Part II crime arrest, except for vandalism, status offenses, and arson. By definition, adults cannot commit status offenses, and for the category of arson the split is near 50-50. The only category wherein juveniles normally make up a majority of Part II arrests is vandalism. One crime which is interesting in terms of age is liquor law violations.

The majority of liquor law arrests are adults, however, within the adult category 64 percent of the liquor law arrests are for the age category of 18 to 20. Most of these arrests are related to the possession of alcohol by minors (less than 21 years old).

ARREST BY RACE

During 1977, 83.3 percent of all reported arrests in Washington State involved caucasians. Blacks accounted for 10.9 percent of the total arrests in the state, while American Indians were arrested in 4.3 percent of the total cases. Other races account for the remaining 1.4 percent state-wide.

Statistics for violent Part I crimes reflect that Whites amassed to percent of the total arrests, Blacks, 23.6 percent, Indians, 3.9 percent and other, 2.5 percent. For Part I property crimes, Whites accounted for 82.9 percent, Blacks, 12.1 percent, Indians, 2.9 percent, and Other, 2.1 percent of the total group of arrestees.

The pattern of arrest by race for Part II crimes as a whole does not differ significantly from the proportions indicated for Part I crime arrests. Whites accounted for 83.8 percent of all Part II crime arrests, Blacks, 10.2 percent of these arrests, Indians, 4.8 percent while others account for 1.4 percent.

Using the total arrest percentage as a base for comparision, some crimes have a higher percentage of involvement for specific racial groups. Whites are more highly represented in arson, DWI's, drug, and status offense arrests. Blacks are more highly represented in other assaults (less than aggravated) and sex arrests. Indians and Whites are both highly represened in liquor law violation arrests.

ARREST BY SEX

During 1977, 80.2 percent of the total reported arrests of all persons in Washington State were male. Males made up a smaller percentage of the Part I crime arrests accounting for only 73 percent of these serious crimes. However, when considering Part I violent and property crime categories, women account for a very small percentage of the violent crimes (8.9 percent) while accounting for a more sizable percentage of the property crimes (28.7 percent).

In regard to the reported arrests for Part II crimes, men account for 82.7 percent of the arrests. Men account for over 80 percent of all Part II crimes except drug, sex, and status offenses.

As arrestees for these crimes, women comprised 22.1 percent of the total for drug related offenses, 29.7 percent of arrestees for sex crimes and 54.2 percent of the reported total juvenile arrestees for status offenses.

SECTION II

PART A

Arrests for cities and counties, 1976 and 1977

PROFILE OF ARRESTS FOR CITIES AND COUNTIES OF WASHINGTON STATE

In this section the arrests are reported by city and county. The numbers of arrests by each reporting jurisdiction for both 1976 and 1977 are detailed. In addition, the types of arrest are subdivided by the major categories within the Part I and the Part II crime categories. If a jurisdiction has reported for less than twelve months within a year, it is noted in the far right hand column. Information is not reported for any year that a jurisdiction did not report for at least ten months. The cities are grouped by size as listed below. The counties are listed by size of population from large to small.

Population totals provide information as to those counties that provide contract law enforcement services to cities or towns in addition to the usual unicorporated area. The size of the population served by contract is defined.

Categories of cities by size:

Greater than 100,000 population
20,000 to 100,000 population
10,000 to 20,000 population
5,000 to 10,000 population
2,500 to 5,000 population
less than 2,500 population

Appendix

Crime Definitions

Crime Definitions

The FBI's Uniform Crime Reporting program collects and reports crime offense data for the nation and in many instances reports data for smaller subdivisions of the country. Essential to the maintaining of uniform and consistent data was the establishment of a standard definition of the offenses used in the program. This insures that offenses with different titles under state and local laws are considered and appropriately counted in UCR.

The definitions in this publication are those published in the FBI 1977 UCR Handbook Revisions.

Part I - Offense Definitions

Criminal Homicide -- Murder and Non-negligent Manslaughter

Murder and non-negligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as in all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides, which are the killings of felons by peace officers in the line of duty, or by private citizens; or attempts to murder or assaults to murder, which are scored as aggravated assaults.

Forcible Rape

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit forcible rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are not included in this category.

Robbery

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or putting the victim in fear.

Aggravated Assault

Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or

Aggravated Assault

other weapon is used which could and probably would result in serious personal injury if the crime were sucessfully completed.

Burglary

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

Larceny -- Theft

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifing, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is excluded from this category for crime reporting purposes inasmuch as it is a separate Crime Index offense.

Motor Vehicle Theft

In Uniform Crime Reporting, motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. This is definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

Part II - Offense Definitions

Other Assaults

Assaults and attempted assaults which do not result in serious or aggravated injury to the victim are included as other assaults.

Arson

Included are all arrests for violations of State Laws and municipal ordinances relating to arson and attempted arson. Included: any willful or malicious burning or attempts to burn, with or without intent to defraud, a dwelling house, church, college, jail, meeting house, public building or any building, personal property of another, goods or chattels, crops, trees, fences, gates, grain, vegetable products, lumber, woods, cranberry bogs, marshes, meadows, etc.

Arson

If personal injury results from the arson, the situation would be classified as aggravated assault. In the event a death results from arson, the incident would be classified as murder.

Forgery and Counterfeiting

Forgery and counterfeiting are treated as allied offenses. In this class are placed all offenses dealing with the making, altering, uttering or possessing, with intent to defraud, anything false in the semblance of that which is true.

Fraud

Fraudulent conversion and obtaining money or property by false pretenses. Includes bad checks, confidence games, etc., except forgeries and counterfeiting.

Embezzlement

Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen Property; Buying, Receiving, Possessing

Included in this class are all offenses of buying, receiving, and possessing stolen property, as well as all attempts to commit any of these offenses.

Vandalism

Vandalism consists of the willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or person having custody or control, by cutting, tearing, breaking, marking, painting, drawing, covering with filth, or any other such means as may be specified by local law. This offense covers a wide range of malicious behavior directed at property such as: cutting auto tires, drawing obscene pictures on public restroom walls, smashing windows, destroying school records, tipping over gravestones, defacing library books, etc.

Weapons; Carrying, Possessing, etc.

This class deals with weapon offenses regulatory in nature, such as carrying a deadly weapon, using a silencer, etc.

Prostitution and Commercialized Vice

Included in this class are the sex offenses of a commercialized nature, such as prostitution, detaining women for immoral purposes, etc.

Sex Offenses

(Except forcible rape and prostitution and commercialized vice.) includes offenses against chastity, common decency, morals, and the like, such as incest, indecent liberties.

Narcotic Drug Laws

Included are all arrests for violations of State and local laws, specifically tnose relating to the unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs.

a. Opium or cocaine and their derivatives (morphine, heroin, codeine).

b. Marijuana

c. Synthetic narcotics -- manufactured narcotics which can cause true drug addiction (demerol, methodones).

d. Dangerous nonnarcotic drugs (barbiturates, benzedrine).

Runaway (Juveniles)

For purposes of the Uniform Crime Reporting program, apprehensions for protective custody are defined by local statute. Runaways are counted as the number of youths who ranaway from a jurisdiction, whether or not they were apprehended by the jurisdictions' police. This figure includes juveniles from a jurisdiction that are arrested in another jurisdiction, but does not include juveniles that were arrested in that jurisdiction who are from another jurisdiction.
